## INTRODUCTION

These tiny little creatures may not look like much but who knows what secrets they're holding?!

Read this to find out!

You'll learn to tell the difference between a male and a female, what they eat and their role in the environment.

## Did You Know?

Males are blue and females are brown.

# DESCRIPTION

Fairy wrens are small and can be either **blue** or **brown**. The males are blue and the females are brown.

## Useful Facts

Average length:  
14cm

Average weight:  
10g

# DISTRIBUTION

# FACTS

## Diet

They like to eat insects and arthropods.

## Habitat

The south-eastern coast of Australia and all of Tasmania.

## Breeding

When males start breeding, they get the blue.

## 5 REASONS TO PROTECT THEM...

### *Why we need our birds.*

1

They control the number of pests.

4

They are important to the food web and balancing it.

2

They can help spread seeds and create more plants.

5

They will help the world by giving the world more colour and happiness.

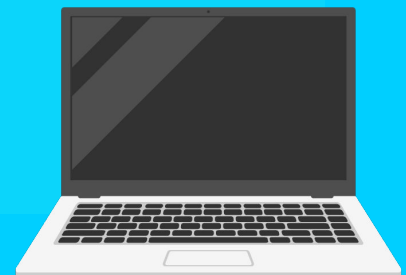

3

We need to protect many species of birds.
